Notes

(forming part of the financial statements)

1 Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements.

Basis of preparation

The financial statements have been prepared in accordance with applicable accounting standards, under the historical cost accounting rules and within the requirements of the Companies Act 2006 and on the assumption that the company will continue to trade as a going concern for the foreseeable future.

Going concern

The company, together with its intermediate parent company Elli Investments Limited and fellow subsidiary undertakings (collectively the "Elli Investments group"), is party to a number of financing arrangements under which the company has provided guarantees. In July 2012, the Elli Investments group issued £350 million of senior secured notes which pay interest at 8.75%, and which are due for repayment in 2019, and £175 million of senior notes which pay interest at 12.25%, and which are due for repayment in 2020. In addition to the external debt, the group owes £270.7 million to related undertakings which accrues interest at 15% on a compounding basis and which is due for repayment in 2022. The group also has access to a £40 million revolving credit facility which is available until 2018. £15 million of this facility was drawn down at the year end and was repaid by the end of February 2014.

During the first quarter of 2014 Terra Firma provided an additional £50 million of equity which will be used by the Elli Investments group to fund both its capital expenditure programme and the increased costs associated with the group's strategic segmentation plan (see the consolidated financial statements of Elli Investments Limited for further detail).

The directors of Elli Investments Limited have prepared trading and cash flow forecasts for the Elli Investments group, including Four Seasons Health Care Group Limited, to September 2015 which, after adjustment for sensitivity analysis to incorporate the impact of reasonably foreseeable changes in trading and cash flow performance, and taking into account resources available to the group, show that it has sufficient funding and covenant headroom within its current financing arrangements.

At 31 December 2013 the company is dependent on funding provided by group companies. For this reason, the funding position of the company is dependent on that of the Elli Investments group as a whole.

Based on these forecasts, the directors of Four Seasons Health Care Group Limited have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The directors therefore believe that it is appropriate to prepare the financial statements on a going concern basis.

Group accounts

The company is exempt under section 401 from the requirement to prepare group accounts as the company's results are consolidated into the accounts of FSHC Group Holdings Limited.

Related party transactions

The directors have taken advantage of the exemption in FRS 8, Paragraph 3(c) and as the company is a wholly owned subsidiary of FSHC Group Holdings Limited have not disclosed related party transactions with parent and fellow subsidiary undertakings.

Cash flow statement

The company is exempt from the requirement of FRS 1 to prepare a cash flow statement as at 31 December 2013 it was a wholly owned subsidiary undertaking of FSHC Group Holdings Limited.

Investments

Investments in subsidiary undertakings are stated at cost less provision for impairment.

Notes (continued)

1 Accounting policies (continued)

Depreciation

Depreciation is provided to write off the cost less the estimated residual value of tangible fixed assets by equal instalments over their estimated useful lives as follows:

Leasehold improvements	over life of lease
Equipment and fixtures	20% per annum
Motor vehicles	25% per annum

Leases

Operating lease rentals are charged to the profit and loss account on a systematic and rational basis over the period of the lease.

Post-retirement benefits

Four Seasons Health Care Group Limited operates defined contribution pension schemes on behalf of its subsidiary companies. The assets of the scheme are held separately from those of the group in an independently administered fund. The amount charged to the profit and loss account of the company represents the contributions payable to the scheme in respect of the accounting period.

Guarantees

Where the company enters into financial guarantee contracts to guarantee the indebtedness of other related parties which are subsidiaries of its ultimate parent, the company considers these to be insurance arrangements and accounts for them as such. In this respect, the company treats the guarantee contract as a contingent liability until such time as it becomes probable that the company will be required to make payment under the guarantee.

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is provided in full on timing differences which result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in the financial statements. Deferred tax is not provided on timing differences arising from the revaluation of tangible fixed assets where there is no commitment to sell the asset. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

Turnover

Turnover represents the amounts net of VAT derived from the provision of health care services to customers and all arose in the United Kingdom.

Adjustments in respect of prior years	-	-
Origination/reversal of timing differences	-	-
Deferred tax charge	-	-
	<u> </u>	<u> </u>
Tax on profit on ordinary activities	<u> </u>	<u> </u>

Factors affecting the tax charge for the current period

The current tax charge for the year is lower (2012: lower) than the standard rate of corporation tax in the UK 23.25% (2012: 24.5%) due principally to the availability of current year losses in other group companies. The differences are explained below.

	2013	2012
	£000	£000
Profit on ordinary activities before taxation	<u>8,916</u>	<u>56,616</u>
Profit on ordinary activities multiplied by standard rate of corporation tax in the UK of 23.25% (2012: 24.5%)	<u>2,073</u>	<u>13,871</u>
<i>Effects of:</i>		
Expenses not deductible for tax purposes/(income not taxed)	62	(13,559)
Depreciation in excess of capital allowances	612	502
Group relief received for nil consideration	<u>(2,747)</u>	<u>(814)</u>
Total current tax	<u> </u>	<u> </u>

Factors that may affect future current and total tax charge:

Reductions in the UK corporation tax rate from 26% to 24% (effective from 1 April 2012) and to 23% (effective 1 April 2013) were substantively enacted on 26 March 2012 and 3 July 2012 respectively. Further reductions to 21% (effective from 1 April 2014) and 20% (effective from 1 April 2015) were substantively enacted on 2 July 2013. This will reduce the company's future current tax charge accordingly and reduce the deferred tax liability at 31 December 2013 which has been calculated based on the rate of 20% substantively enacted at the balance sheet date.
